

Activity Review

In the word grid task we learnt about analysing different forms of languages, and identifying patterns within words that help us with inferring the meaning of new ones. It broadened our understanding of the field of linguistics. We also realised how different people understand new languages, or how babies might start to pick up languages by recognizing patterns.

As for the second activity, the reading of Sherlock Holmes helped us gain insight into complex problem solving. We learned about looking at a problem from multiple angles and thinking outside the box. A lot of the times, the answers to solving a problem lie in the small details that we might miss when investigating. We must be thorough in our search for answers.

The stories I read were "A case of identity", "Red-headed league" and "Speckled band".

The first story, "A case of identity", demonstrated his outside the box thinking skills. He was able to solve the case without even leaving his room. Infact, according to him the case was unbelievably trivial.

The second story, "Red-headed league", made Sherlock search for the answer, but his quick thinking helped prevent a big robbery.

The third one, "Speckled band", made us recognize Sherlock's call for his duty and his love for his work, where he would go above and beyond to help a damsel in distress.
